# BERKSHIRE COUNTY PROJECTIONS

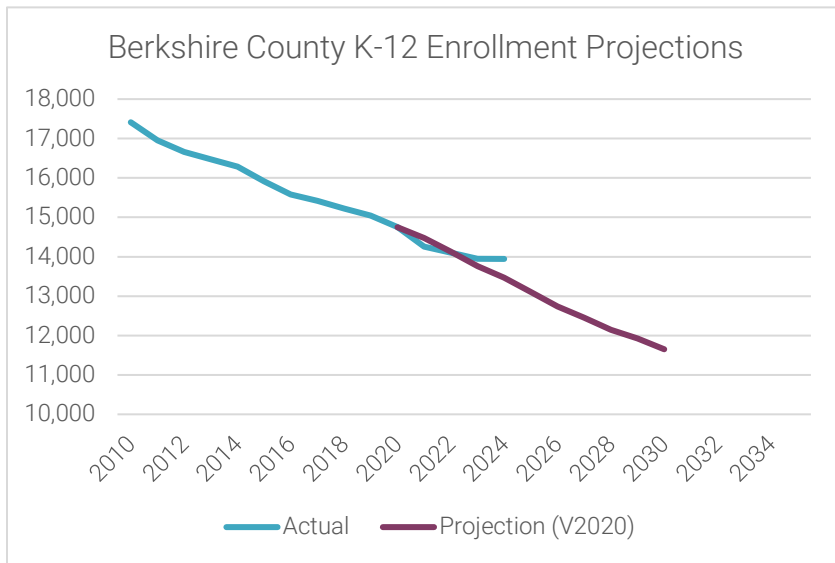

## PREVIOUS PROJECTIONS

In 2015, the Berkshire Regional Planning Commission released the "Berkshire Public School Enrollment Trends" report, which reviewed current enrollment trends in the county and projected future enrollment to 2025 based on births and year-to-year grade changes. Updates to the 2015 projections were done in 2018 and 2020. In 2020, the pandemic hit the Berkshires and disrupted public school enrollment. Many children were taken out of school to be homeschooled or sent to private schools. In addition, many people, including second homeowners, relocated to the Berkshires. This resulted in the 2020 projections being out of date immediately. The new V2024 projections, which run from 2025 – 2035, incorporate several more years of births and enrollment trend data.

The enrollment data shows that from 2020 to 2024, the county lost over 800 students, with a steep decline in 2021 and more moderate declines in 2022 and 2023. In 2024, the decline was only one student.

## BIRTHS

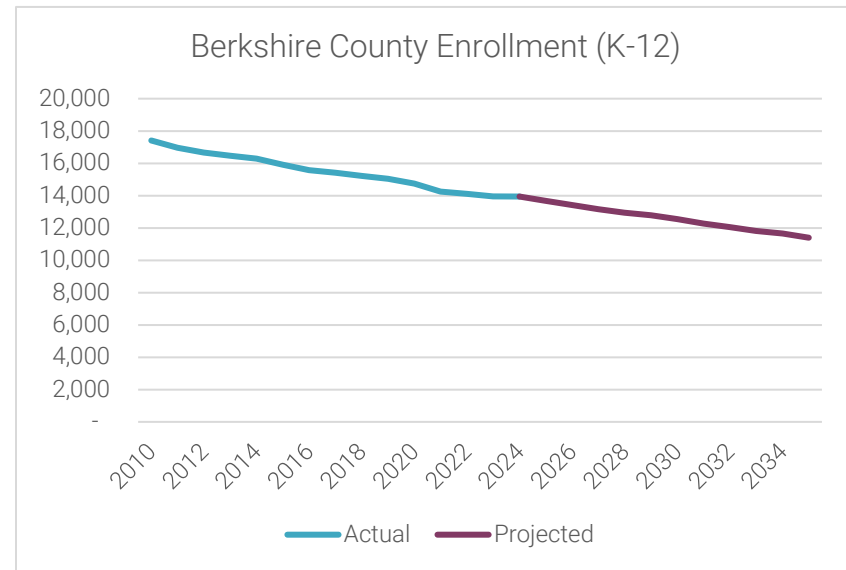

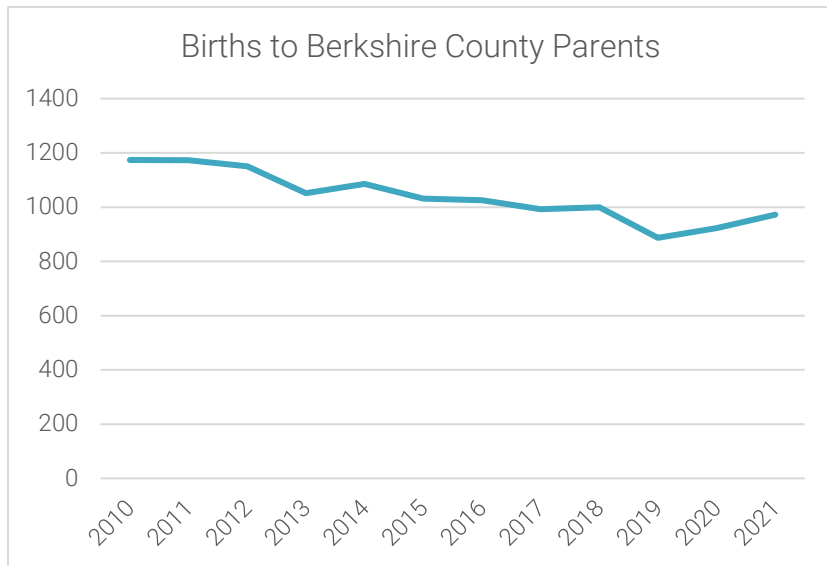

The birth data also shows an increase in births in the county in 2020 and 2021, countering decades of declining births in the region; however, the general trend is still one of decline. The 2022 data is available for the county but not the municipalities, so the 2024 projections do not use the 2022 birth data. This newest data shows 862 births in Berkshire County in 2022, the lowest level in decades, and a significant decline of 110 births since 2021.

## Berkshire County Births

Year	Births	Year	Births
2010	1,174	2016	1,026
2011	1,173	2017	992
2012	1,151	2018	999
2013	1,052	2019	887
2014	1,086	2020	923
2015	1,031	2021	972

**COUNTY PROJECTIONS**

Student movement between grades impacts short-term projections; however, births significantly impact long-term projections. With continued declines in births and increased migration, the new projections show a continued decline in enrollment, but not as significant as projected in 2020. By 2035, the projections indicate Berkshire County will have a K-12 Public School Enrollment of 11,397, which is 2,547 less than the 2024 enrollment, a decline of 18%. These projections do not include pre-K or post-12 Special Education enrollment for the districts.

Based on existing 5-year trends, these projections are only projections and should not be assumed to be perfect. As with any projection, the further out from the baseline (2024), the higher the chance of error. Any changes locally, regionally, or nationally to birth rates, migration rates, and even the economy can cause these

projections to be incorrect. In addition, international immigration into the region could significantly impact school enrollment.

# SCHOOL DISTRICT ENROLLMENT PROJECTIONS

In reviewing the 2024 actual enrollment to the V2020 projections, while the county numbers are 477 students off, primarily due to the impact of the pandemic, the individual school districts varied widely from the V2020 projections, primarily due to changes in migration into and out of the district.

The new K-12 projections (V2024) take into account changes in births, migration, and choice to neighboring districts. Overall, most of the mid to large districts will see a decline in enrollment. Exceptions include Central Berkshire RSD, Hoosac Valley RSD, and Lenox SD, which see stabilization to minor growth. In addition, the non-traditional districts, Northern Berkshire Vocational and Berkshire Arts and Technology Charter, will see a stable enrollment. It is important to note that the projections for the small school districts have a large margin of error and a change of one or two students can significantly impact the projections. For these small school districts, the projections vary widely, and they should expect a more stable population than projected.

## School District K-12 Enrollment Comparison (V2020)

School District	2020 K-12 Actual	2024 K-12 Actual	2024 K-12 Projected (V2020)	2020 K-12 Difference (Actual – Projected)

## Berkshire Arts & Technology Charter School

Based on the projections, the Berkshire Arts & Technology Charter School shows an increase in yearly enrollment. However, BART has a state enrollment cap of 363, so it is unlikely to increase as much as projected. In addition, most of its students come from North Adams and Pittsfield. As their projected enrollment declines, it adds doubt to BART's ability to add additional students.

### Berkshire Hills Regional School District

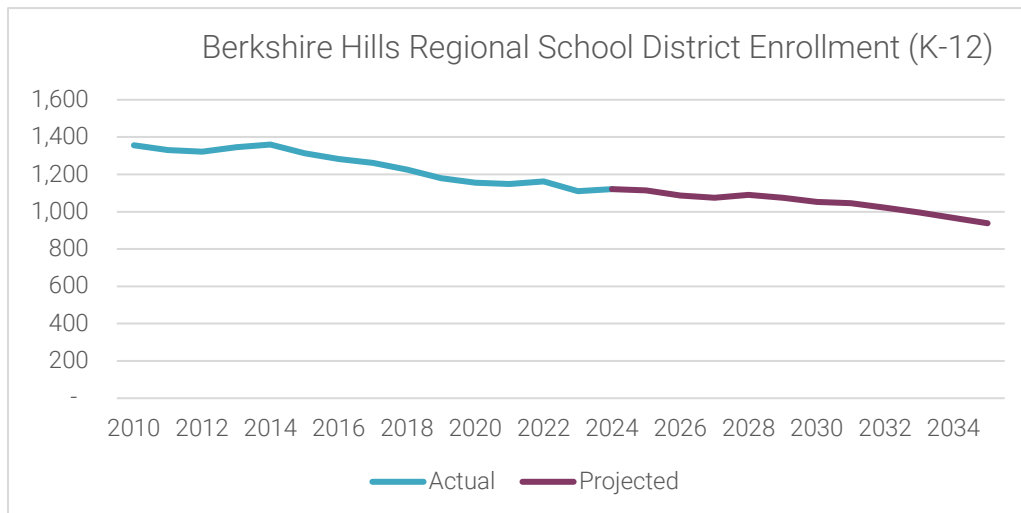

In 2024, the Berkshire Hills Regional School District had 1,121 students enrolled in K-12. While it has gained 11 students since 2023, the trend over the last decade is to lose an average of 21 students yearly. The district appears to lose students entering 1<sup>st</sup> and 10<sup>th</sup>-12<sup>th</sup> grades while gaining in other grades. The number of births, while increasing slightly in the last two years, continues to decline. The projections show that the district will lose 154 students between 2024 and 2035. The projected enrollment amounts to a 14% decline in enrollment.

### Central Berkshire Regional School District

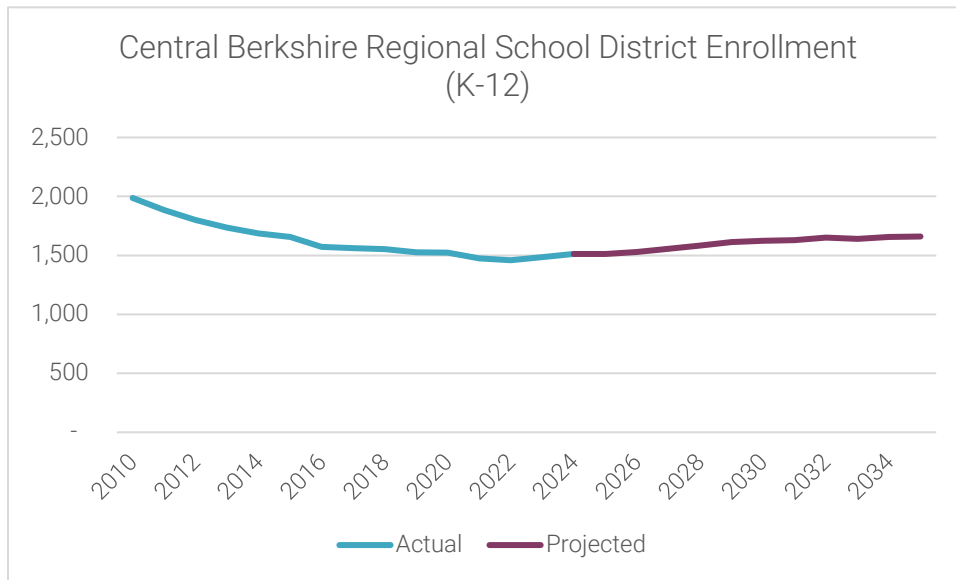

The Central Berkshire Regional School District is projected to gain 148 students between 2024 and 2035. This increase is due to a stable/increasing number of births over the last eight years, as well as seeing a significant number of students move into the area between birth and kindergarten. The district also continues to see an increase in students moving into and using choice throughout all grades from K – 9. In high school the district tends to lose students to vocational schools, charter schools, and students dropping out of school.

### Clarksburg School District

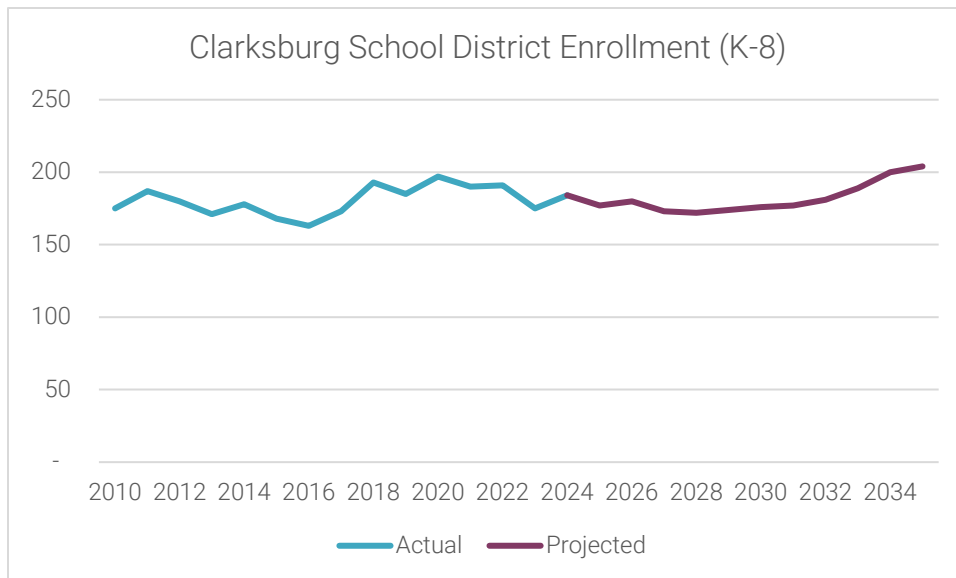

The Clarksburg School District is projected to have a stable enrollment over the coming ten years. It will decline for the first few years but then rebound to where it is today. The school tends to gain enrollment through grades K-6 but begins to lose students in 7<sup>th</sup> grade.

## Farmington River Regional School District

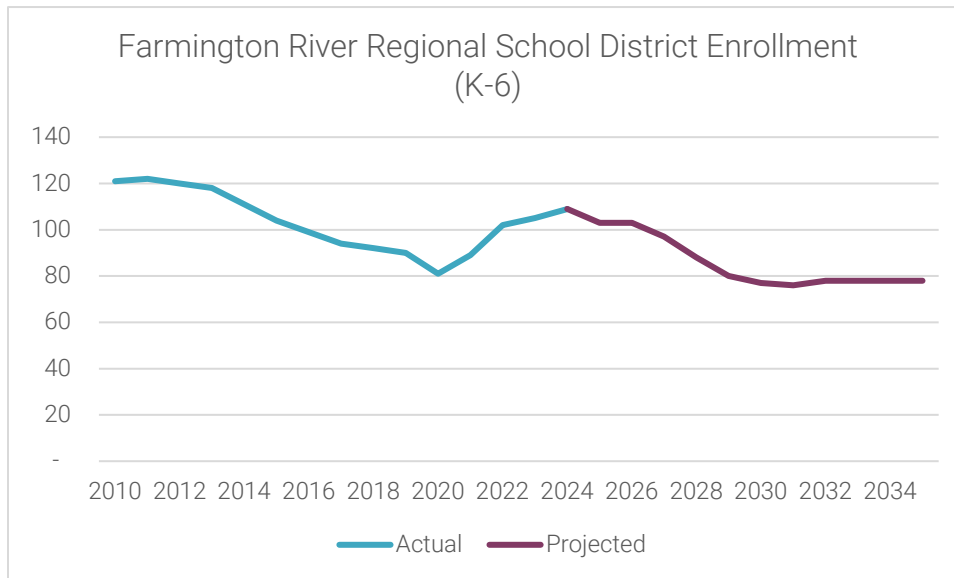

The Farmington River Regional School District has seen an increase in the number of students since 2020. It will continue to see stable numbers for the next few years. Due to their low birth numbers, overall enrollment is expected to decline between 2027 and 2029, when it stabilizes at 75-80 students.

## Hancock School District

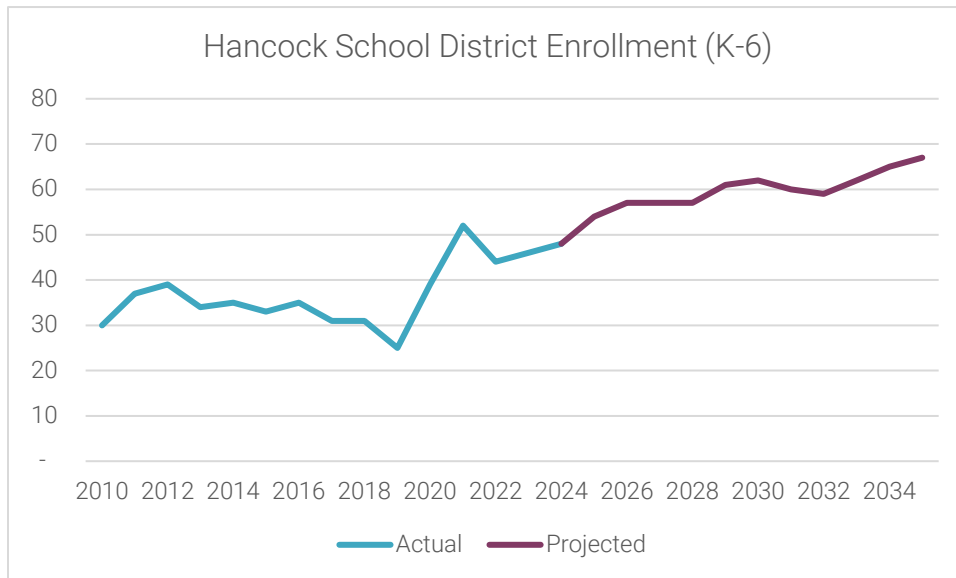

The Hancock School District has grown since 2020, and the enrollment projections indicate it will continue to grow over the coming decade. This increase is primarily due to a slightly higher number of births occurring. With a small district like Hancock, the projections can vary significantly due to 1-2 families moving in or out of the district.

### Hoosac Valley Regional School District

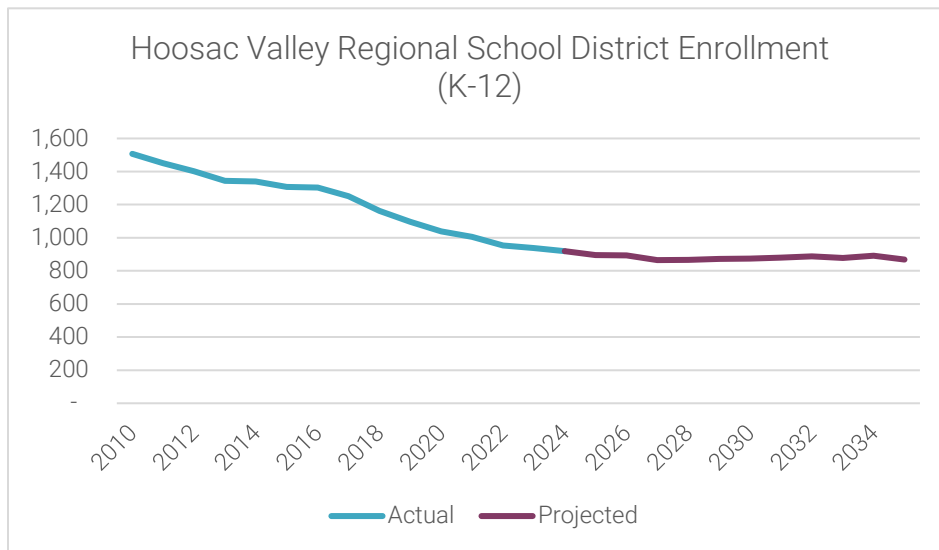

The Hoosac Valley Regional School District will see a continued decline in enrollment through 2027, after which it will see a stable enrollment. The district loses a significant number of students before kindergarten when many begin attending St. Stanislaus Kostka, and again before 9<sup>th</sup> grade when students enter McCann Technical School. The district sees a smaller number of students also depart in 6<sup>th</sup> grade to attend Berkshire Arts and Technology Charter School.

## Lee School District

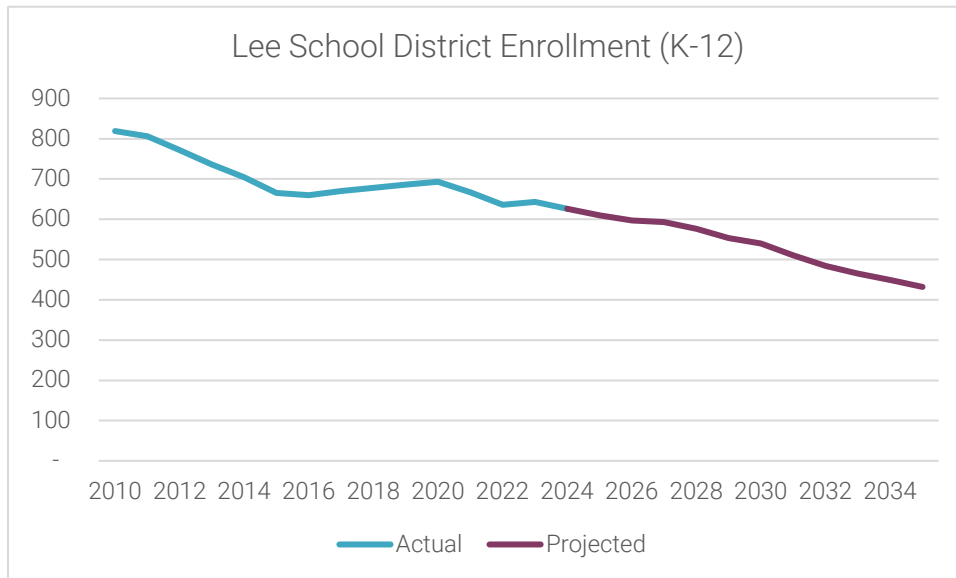

The Lee School District will continue to see a decline in enrollment over the coming decade. The district has seen a significant decline in births over the last decade. On top of that, the district loses many students to choice prior to first grade and in high school, but gains students throughout grades 7-9.

## Lenox School District

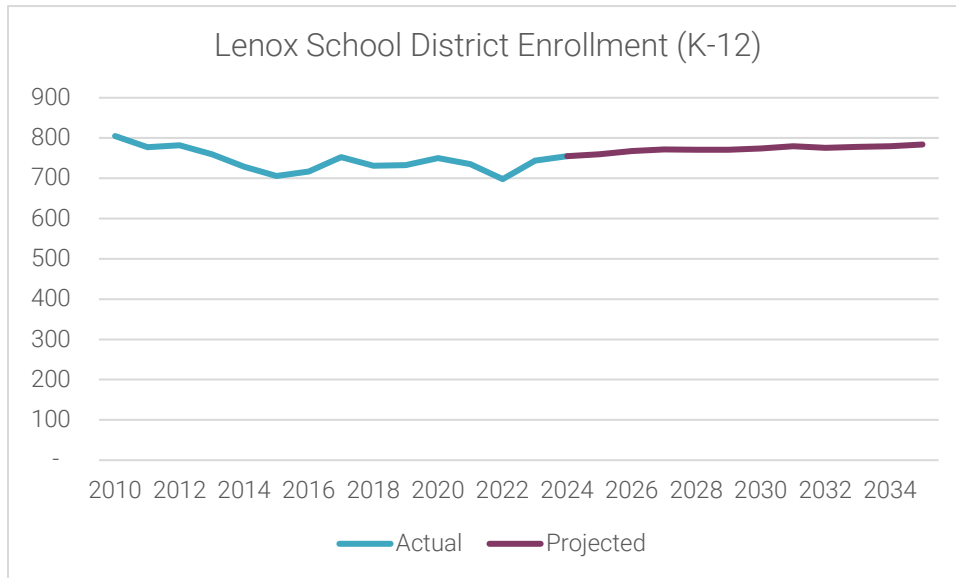

The Lenox School District has experienced a slight increase in enrollment since 2020 and will continue to see a slight increase through 2035. Lenox experiences a major influx of students between birth and kindergarten, made up of students moving to the town as well as choice students. The district also experiences a large influx for sixth grade.

### Mount Greylock Regional School District

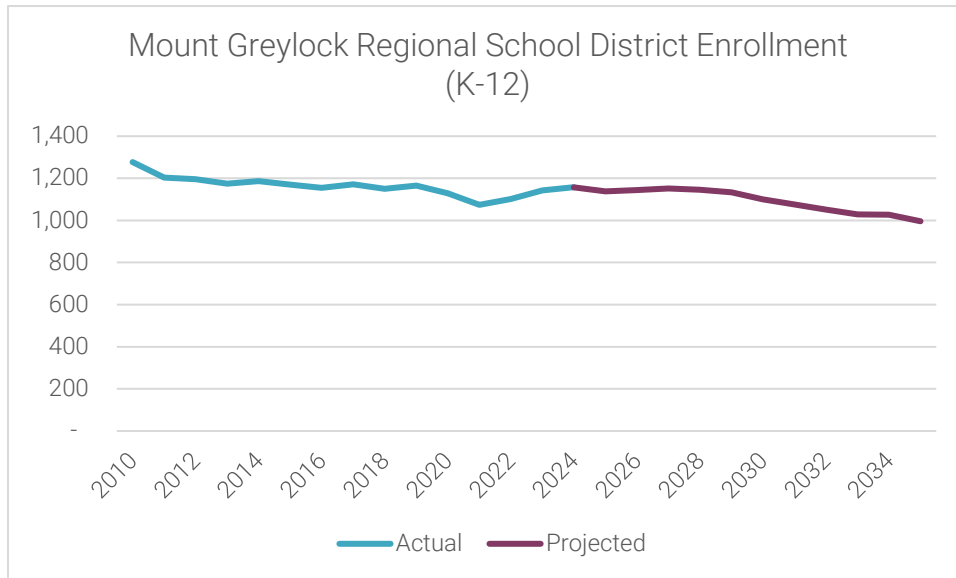

The Mount Greylock Regional School District will see its enrollment stay relatively stable between 2024 and 2026. However, it will see a moderate decrease through 2035. The district sees a significant increase between birth and kindergarten, a minor influx through 8<sup>th</sup> grade, and then a decline in students in high school, primarily due to students attending vocational schools.

## North Adams School District

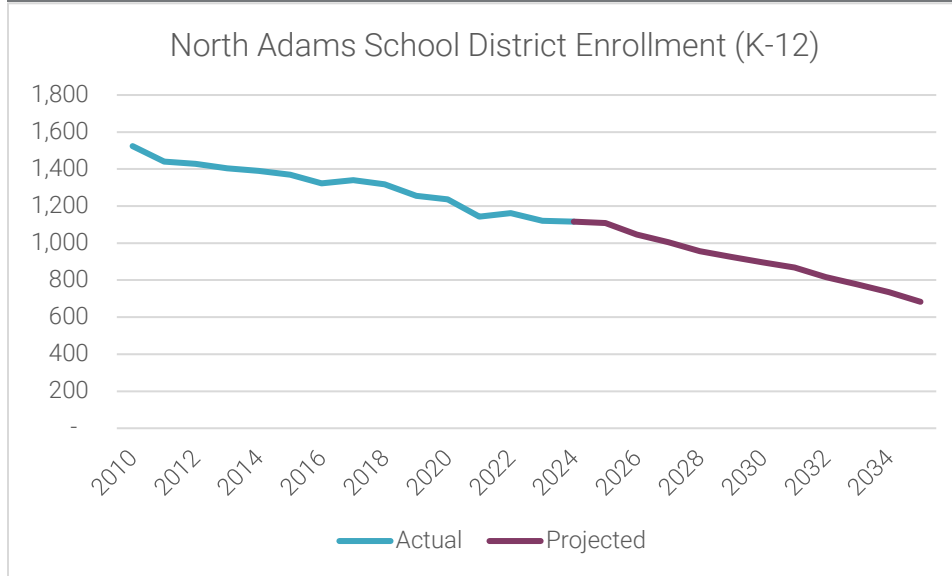

The North Adams School District will continue to see a significant decline in its enrollment over the coming decade. This decline is due to several factors. The number of births occurring to North Adams parents has declined significantly over the last few decades. On top of the birth decline, the district loses almost a quarter of all students between birth and kindergarten. The district then loses 20% of students entering 6<sup>th</sup> grade, likely due to them attending BART. The district loses a further quarter of its enrollment entering 9<sup>th</sup> grade due to students attending McCann Technical. As a result of these three major departure grades, the district loses 47% of all students who were born in North Adams prior to 9<sup>th</sup> grade.

### Pittsfield School District

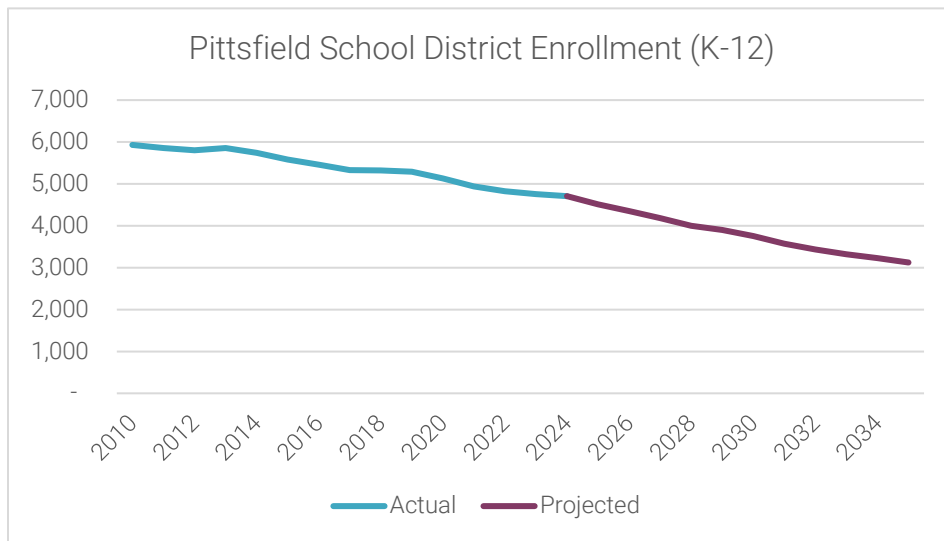

The Pittsfield School District is projected to continue to lose enrollment over the coming decade. The number of births to Pittsfield residents has dropped by 20% in the last decade. In addition, the district loses almost 26% of its potential enrollment between birth and kindergarten. Additionally, the district loses another 16% before 6<sup>th</sup> grade, when students begin going to BART or to other districts via choice. The one grade that shows an increase in students is 9<sup>th</sup> grade, which is likely due to the vocational programming that is offered at Taconic High School. All other grades see an average of 2.8% loss per year.

## Richmond School District

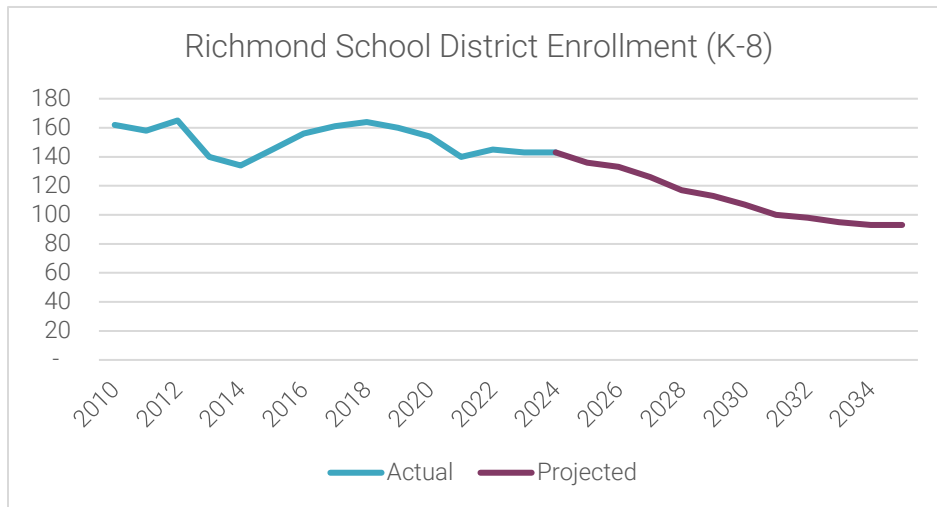

The Richmond School District has been experiencing a decline in enrollment since 2020 and is projected to see a continued decline in enrollment through the next decade. The district saw a rise in births through the late 2010's, but the birth numbers have since declined. The district doubles the number of students entering between birth and kindergarten due to families moving into the district and choice students, mostly from Pittsfield. Once students are enrolled in kindergarten, the enrollment stays relatively stable throughout the grades.

### Savoy School District

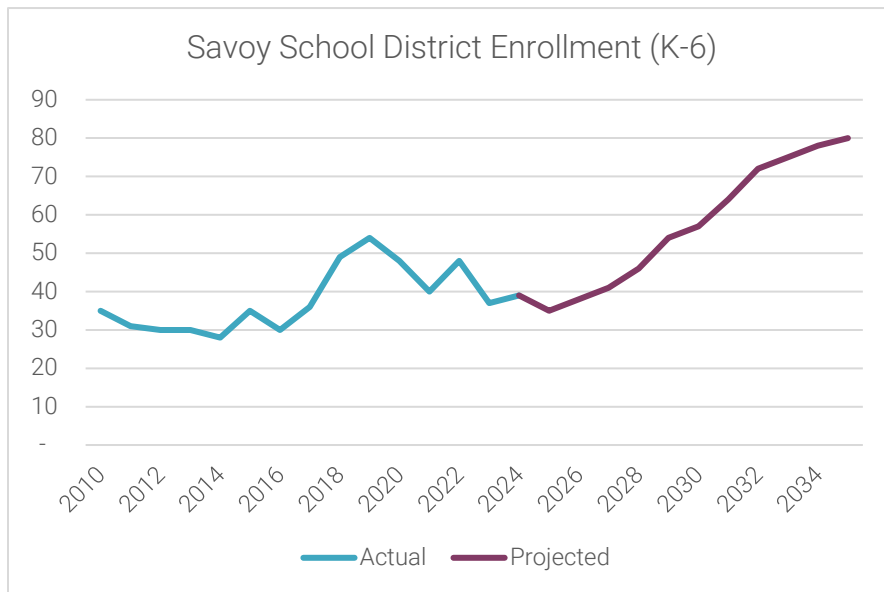

The Savoy School District is projected to increase throughout the next decade, starting in 2026. This increase is primarily due to an increase in the number of births to Savoy residents. However, projections for small districts like Savoy are challenging more than a few years out. A single family moving in or out of the district can drastically change the projections due to birth or grade-to-grade enrollment changes.

## Southern Berkshire Regional School District

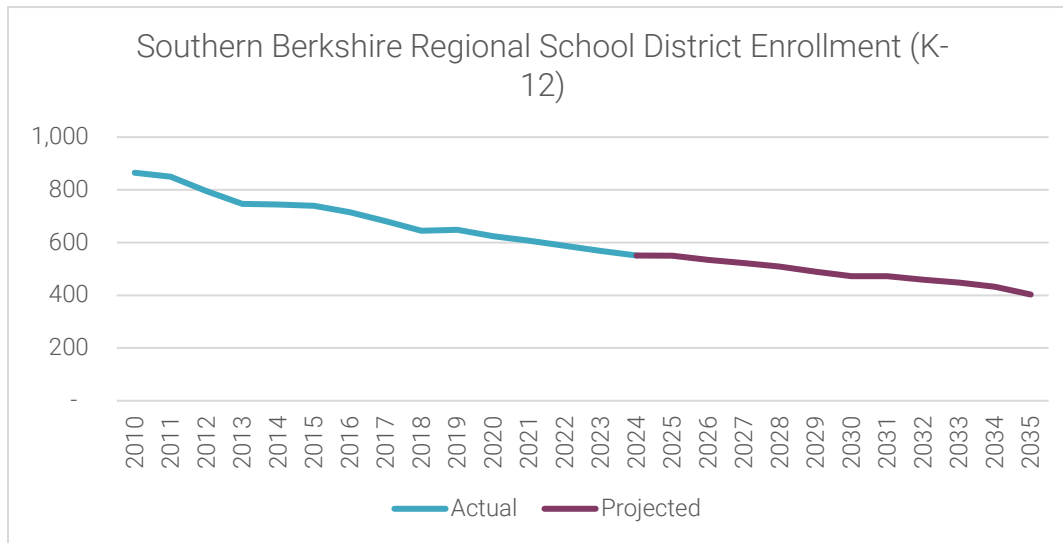

The Southern Berkshire Regional School District has been experiencing a decline in enrollment of 20 students per year for at least the last two decades. This decline will slow to an average of 13 students per year for the next decade. A large portion of this decline is due to reduced births within the district towns. The district gains a significant number of students between birth and kindergarten, but then loses most of that gain between kindergarten and first grade. The district also loses many students between fourth and fifth grade. Other grades tend to lose a few students each year as well, with the exception being a gain between second and third grade.
